Summary

I'm a Software Engineer with over 14 years of experience in various industries such as public services, travel, education, finance and video streaming services. Proficient in JavaScript, TypeScript, React, Angular 2+, Node.js (Express.js, Next.js). Experienced in building high-load single page applications and npm packages from scratch. Skilled in developing complex adaptive interfaces, configuring CI workflow and solving non-trivial problem. Well-versed in Agile methodologies.

Primarily interested in product development:
- Opportunity to participate in product improvement
- Teamwork using Agile methodologies
- Ability to see the result of work (Analytics)

Looking for an employment contract (HPP)

Experience

Senior Software Engineer
Conrad Electronic Group
Aug 2021 - Present (8 months +)
Refactoring and support of the e-commerce platform:
- Refactoring React components with the transition from JS to TypeScript
- Refactoring the frontend build with migration from Gulp to Webpack
- Creating plugins for Webpack
- Tracking and logging user actions for GTM
- Improving the interface on the product detail page
- Improving the adaptability of the interface for both mobile and print versions

Lead Software Engineer
Luxoft
Aug 2019 - Mar 2021 (1 year 8 months)
Team leader on a high-load project of public services.
Our team has developed a new version of the form player from scratch.
- Built a client-side architecture
- Configured CI workflow (Gitlab)
- Integrated automatic code verification (linters, tests, static code analysis)
- Configured the code review process
- Involving team members in product improvement (growth team)
- Conducted 1-2-1 meetings with developers
- Interviewed candidates for developer position
- Delivery as an npm package
The first version was put into production in 3 months.

Senior Software Engineer
Tutu.ru

Mar 2018 - May 2019 (1 year 3 months)

I developed bus selling section (single page application with React) on high-load (with more than 6 millions users per month) travel site system.
- Page loading speed on high-load pages has been optimized by more than 2 times
- The search form was refactored (an important part of the product) which was necessary to fix a large number of inherited and global logical errors
- 2-fold increase in unit test coverage
- Developed new services for product
- Performed Code Reviews
- Had experience in Scrum team
- Worked closely with UI/UX designer

Lead Software Engineer
CUSTIS

Sep 2017 - Mar 2018 (7 months)

I led a front-end development team of 10 people on the education project:
- Planning the work of frontend teams
- Made knowledge-sharing and documentation creation processes
- Performed Code Reviews
- Conducted 1-2-1 meetings with developers
- Interviewed candidates for developer position
- Implemented GitLab Flow which allowed to eliminate time-consuming "git rebase"
- Implemented TSLint to improve code readability
- Participated in the development of UI-kit for the project

Frontend Developer
Atlas

Oct 2016 - Apr 2017 (7 months)

It was a startup representing the freemium model of a cellular operator.
- Created from scratch a web application to manage a personal user account (Angular)
- Made suggestions for improving the product on brainstorms
Unfortunately, the startup didn't take off, but I got invaluable experience.

Senior Software Engineer
Rutube

Nov 2013 - Oct 2016 (3 years)

Participated in the development of projects:
- Video hosting Rutube
- Development site and secure online voting system for the TEFI award
- Broadcasts service NTV Plus
- Developed the interface part of the online video editor for NTV Plus which makes it possible to cut highlights from the live broadcast (Angular 2, D3.js).
- Made content management system for NTV Plus (single-page application using Angular 2).

Software Engineer
BARS GROUP
Mar 2012 - Oct 2013 (1 year 8 months)
I developed front-end part of projects for public services such as:
- Monitoring Cultural Heritage
- Accessible Environment
- Social network for school children

Web Developer
Freelance
Nov 2007 - Mar 2012 (4 years 5 months)
I have created websites using CMS such as Wordpress, Joomla, NetCat, 1C Bitrix.

Honors & Awards

1st Place in the Yandex Open Data Hackathon 2013 - Yandex

Sep 2013

The goal of the hackathon was to create a socially useful application based on public open data using one of the Yandex services.

4th Place in the Telegram contest for JavaScript developers 2019 - Telegram

Nov 2019

The goal of the contest was to create a simplified web version of Telegram without using third-party UI frameworks. The application had to include the flow of the login/registration and allow you to view a list of chats and messages.
